

FRESH FOOD CRATES

BOX4000

Features

Made of polypropylene (PP) with additives to resist ultraviolet rays, complying with European standards UNI-EN 13117

Dedicated to the fresh-food sector, they are grey and are available in five formats

Specially made for food, they are easily washable and do not undergo tare movements

Equipped with closed bottom and label with Data Matrix code - Barcode EAN128

Operating temperature: the boxes are suitable for use at temperatures between -10 and +50 degrees centigrade

Hygienic packaging guaranteed by washing after each use

Advantages

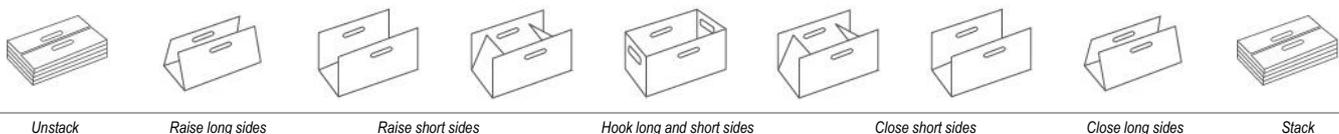

- Optimal transport packaging that guarantees freshness and quality of goods throughout the production chain, particularly for meat, from the producer to large-scale distribution.
- Easy and safe foldable stacking
- They are suitable for refrigerated shelves
- Optimum protection during transport guaranteed by stability and rounded internal corners
- Folding side panels reduce space and empty handling costs (4 closed crates occupy the space of 1 open - ref. Model CG18)
- Significant reduction of damage to goods during transport and storage
- Reusable packaging system
- Completely recyclable in every part, CPR System crates eliminate any packaging waste which would impact the environment
