

MINIBINS

Fruit and vegetables

Features

Made of high density polyethylene (PEHD), with characteristics that make them particularly resistant to U.V. rays, to acids and alkalis, to aging and to atmospheric agents as well as high and low temperatures

Dedicated to the fruit and vegetable sector, they are pantone green colour 355C and are available in two easily stackable formats

Specially designed for food, are easily washable and do not undergo tare movements

They are well ventilated to facilitate fruit and vegetable transpiration and are equipped with removable interlocking label holders

Equipped with TAG R-FID and tag with Data Matrix code and Barcode EAN128

Advantages

- Optimal transport packaging that guarantees freshness and quality of goods throughout the production chain, particularly for fruit and vegetables, from the producer to large-scale distribution.
- Easy and safe foldable stacking
- Reusable packaging system
- Optimum protection during transport guaranteed by stability and rounded internal corners
- Accessibility guaranteed to the forklift on 4 sides (model M8012)
- Folding shutters, reduce space and costs in empty handling
- Easy replacement of components
- Significant reduction of damage to goods during transport and storage
- Characterization with customized logos and colour
- Completely recyclable in every part, CPR System crates eliminate any packaging waste which would impact the environment
